ANALYTICS**

Scope Infotech has supported the enhancement of our Nation's Health IT Infrastructure through our support of major federal health programs including Medicare, Medicaid and the Health Insurance Marketplaces.

We are supporting the advancement of electronic health records, interoperability and clinical quality.

Our organization is committed to the security of health IT systems and delivers solutions for authentication, standards and compliance, access control and audits. Scope Infotech continues to be a strategic partner in the implementation of major health IT systems.
